Malpractice

Last Updated:

There is important information below to help you understand medical malpractice. This physician may have provided important additional information in the physician statement section of this profile.

Judgments and Arbitration Awards

Number of awards: 0

Payment Details

Date of Judgment or Award	Zip Code or County of Event	Significance of Payment
None reported	None reported	None reported

Settlements

Settlement payments will appear in this profile only if the total number of settlements made within the past ten years is equal to three or more. Settlement of a claim may occur for a variety of reasons, which does not necessarily reflect negatively on the professional competence or conduct of the physician. A payment in settlement of a medical malpractice action or claim does not necessarily mean that a medical malpractice has occurred. When a settlement payment is made, the patient agrees to accept some money and stop the legal action--without going to court.

If only one or two settlements appear, it means that the Department of Health determined that the settlement(s) are relevant to patient decision making.

We encourage you to talk with the doctor about the information in this report.

High/Low Agreements

Increasingly more and more popular in civil litigation, plaintiffs and defendants, prior to going to trial, will enter into "high-low agreements."

The agreement sets a maximum amount (the "**high**" amount) that a defendant will pay to the plaintiff, if the judgment is **against the defendant**. In return for agreeing to this cap on the damages award, the agreement provides for a minimum amount (the "**low**" amount) that the defendant will pay to the plaintiff, if the judgment is **against the plaintiff**.

The jury is not told of the agreement and only issues the verdict, which is the sole judgment of the court. The award is made pursuant to the terms of the high-low agreement and, is therefore, considered to be a settlement agreement.

Number of payments: 1

Payment Details

Disposition Date	Zip Code or County of Event	Significance of Payment	High/Low Agreement High | Low
02-27-2023	11554	Average

Doctor's Statement (Optional)

Last Updated:

I have been practicing orthopaedic and spine surgery in New York City and Long Island for over 15 years. I have maintained a continuously active and unrestricted license the entire time. I have strived to provide the latest innovations and techniques for the patients of this region by keeping up to date with the newest technologies and not resting on previous beliefs or surgical modalities. I have contributed to the profession through resident teaching,

giving lectures, participating as site principal investigator in randomized clinical trials for spinal cord injury, and publishing primary research articles. My publications have contributed to information preventing surgical site infections and studying bone disease burden of the Long Island population. Most importantly, I have maintained my board certification through education and the rigorous recertification process.
